Biobased Lubricants

- An ecologically friendly, renewable resource
- Reduces friction better than petroleum oil

10444
LubriMatic™ All Purpose
Lubricant & Penetrant
12 oz. Aerosol Spray
\$3.67

10301
Multi-Purpose Lithium Grease
14 oz. Cartridge
\$2.13

10314
Moly EP Grease
14 oz. Cartridge
\$2.56

10320
LMX "Red" Grease
14 oz. Cartridge
\$2.81

Biobased lubricants are manufactured from renewable vegetable-base stocks which have a naturally higher Viscosity Index. This means that biobased oil is less likely to "thin down" at high temperatures providing reduced overall operating temperatures and a higher degree of lubrication-safety, especially in high-speed applications.

Biobased lubricants have 4 times the natural lubricity of petroleum. This translates to less friction, less heat and less wear.

Biobased lubricants are safer for you, your health and the environment. LubriMatic Green™ lubricants are premium quality biobased products formulated from renewable, biodegradable USA-grown vegetable oils. These quality lubricants are designed to replace and mix readily with conventional petroleum products to help you and your customers use safer and more environmentally friendly lubricants.

Prices subject to change.
